## VOLUME 01: THE AERO-STATIC ARCHITECTURE

2025 NotebookLM

# COLLECTIONS AS LIVING CATALOGUES.

Students are not custodians of archives; they are collaborators in reinvention. We navigate fragments from Gothic cathedrals to modernist dreams, remixing them to construct new worlds.
Space Mono

NotebookLM

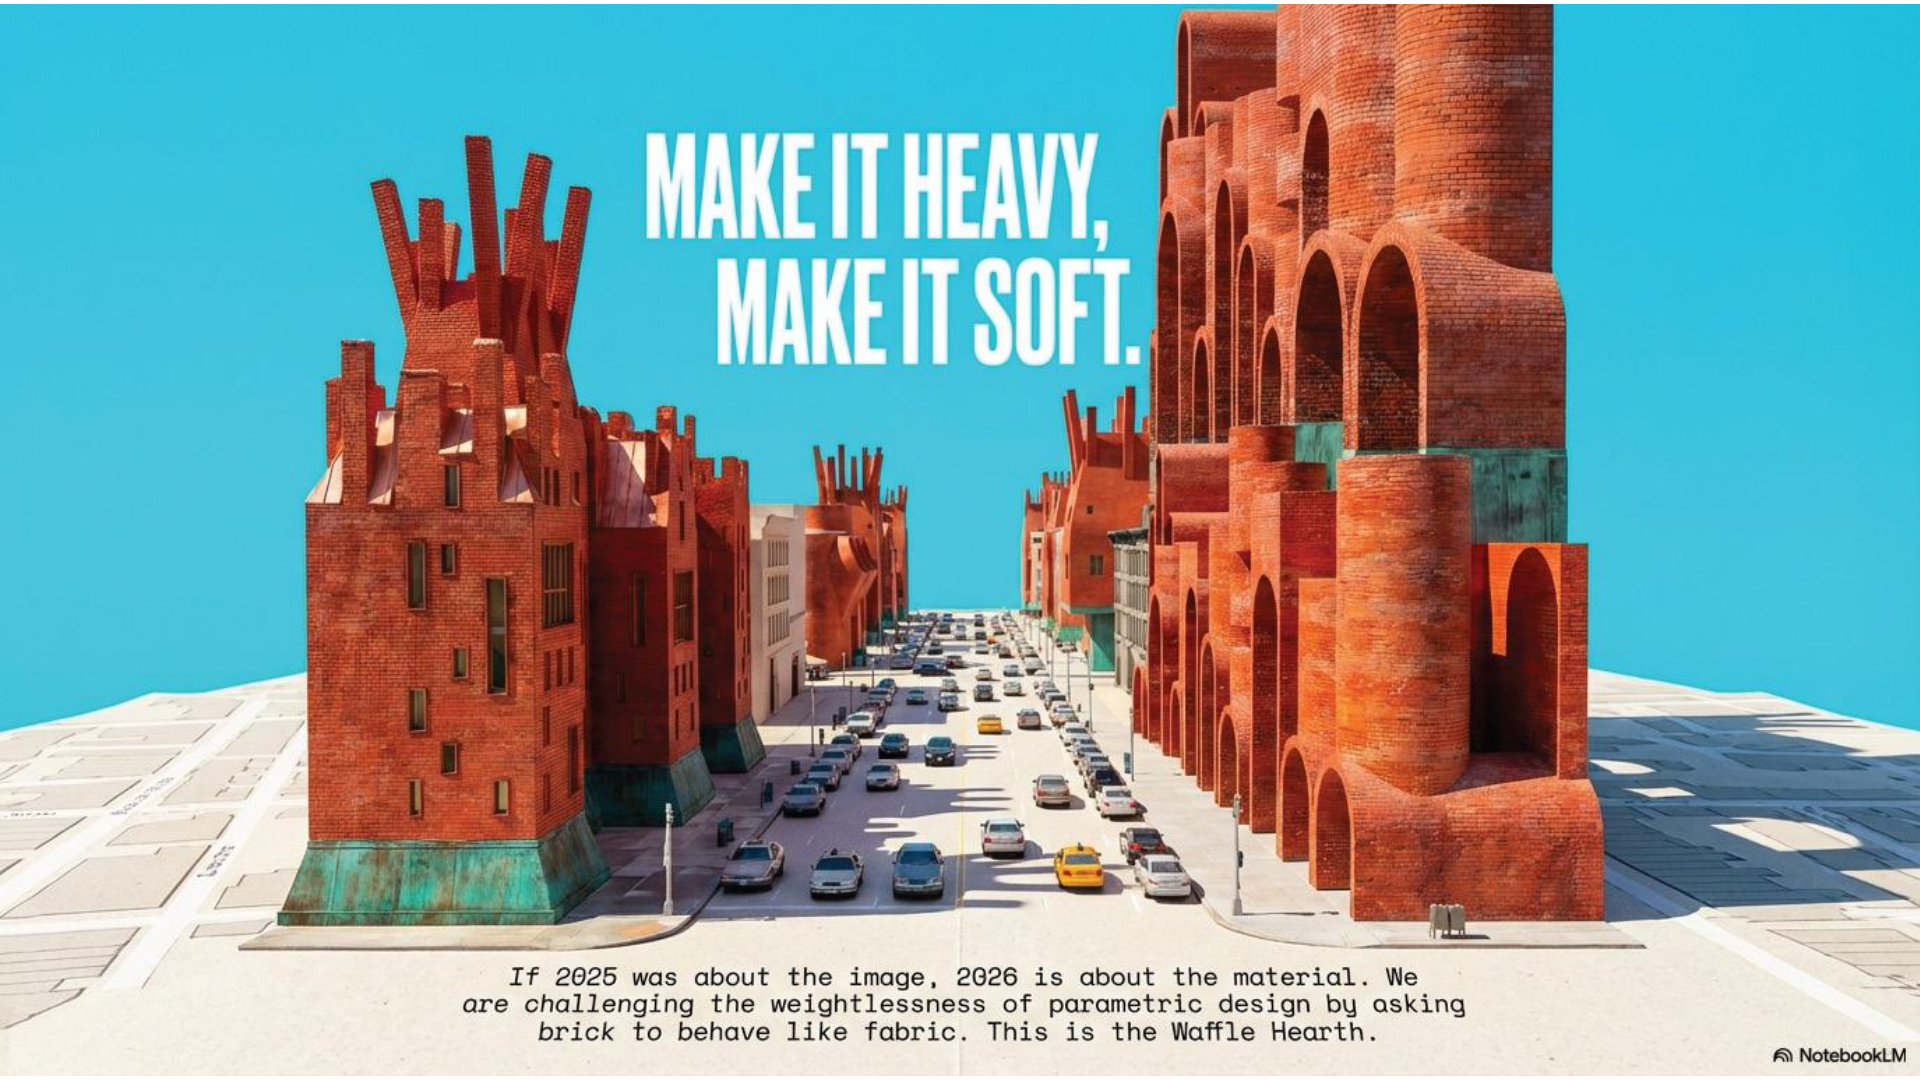
ARCHITECTURE AS A DOPAMINE HIT.
THE CITY THAT SMILES.
Resolution for 2026: Architecture must produce joy. For too long, we have equated "serious" design with grayscale minimalism. We are engineering the infrastructure of optimism.
NotebookLM

# THE ERA OF MACRO-CRAFT

**Space Mono**

I don't just see buildings—I see jewelry. I see armor. By obsessing over the "Golden Scale," we explore how oxidation and patina can replace the sterility of modern glass.

NotebookLM



*If 2025 was about the image, 2026 is about the material. We are challenging the weightlessness of parametric design by asking brick to behave like fabric. This is the Waffle Hearth.*

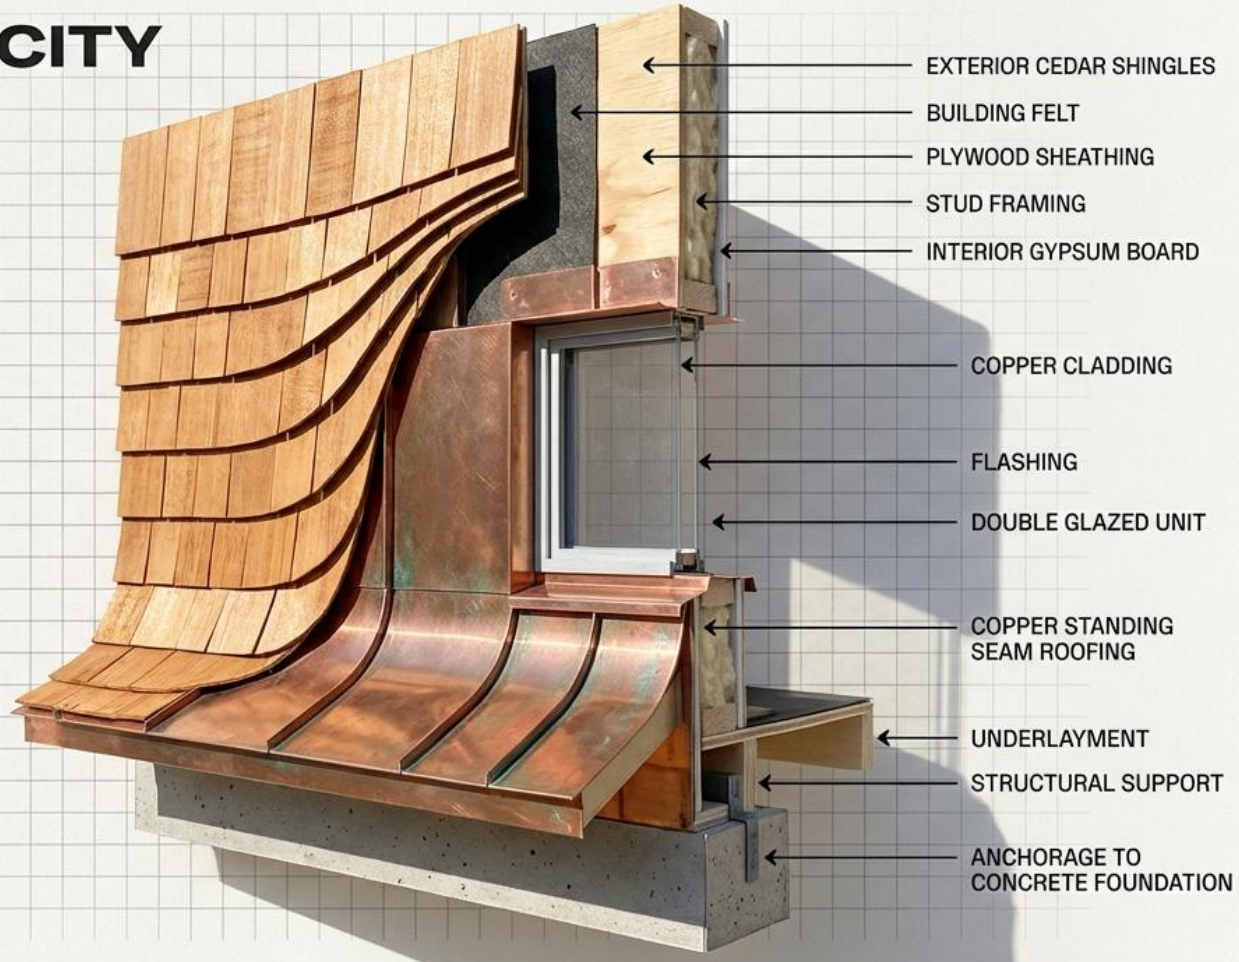
NotebookLM

# THE KNITTED CITY

A counter-narrative to the gray winter.

We propose “parasitic” facade retrofits that treat masonry like a warm blanket.

A strategy of Radical Cute.



NotebookLM

Why can't a skyscraper feel as warm as a cabin? The obsession with sleekness is over. We are scaling up the domestic to the monumental.

NotebookLM

# NO MORE BEIGE

Architecture as typography.
A city that reads like a comic book.
These buildings don’t just sit in the background; they wink at you.

NotebookLM

# THE PNEUMATIC VERNACULAR.

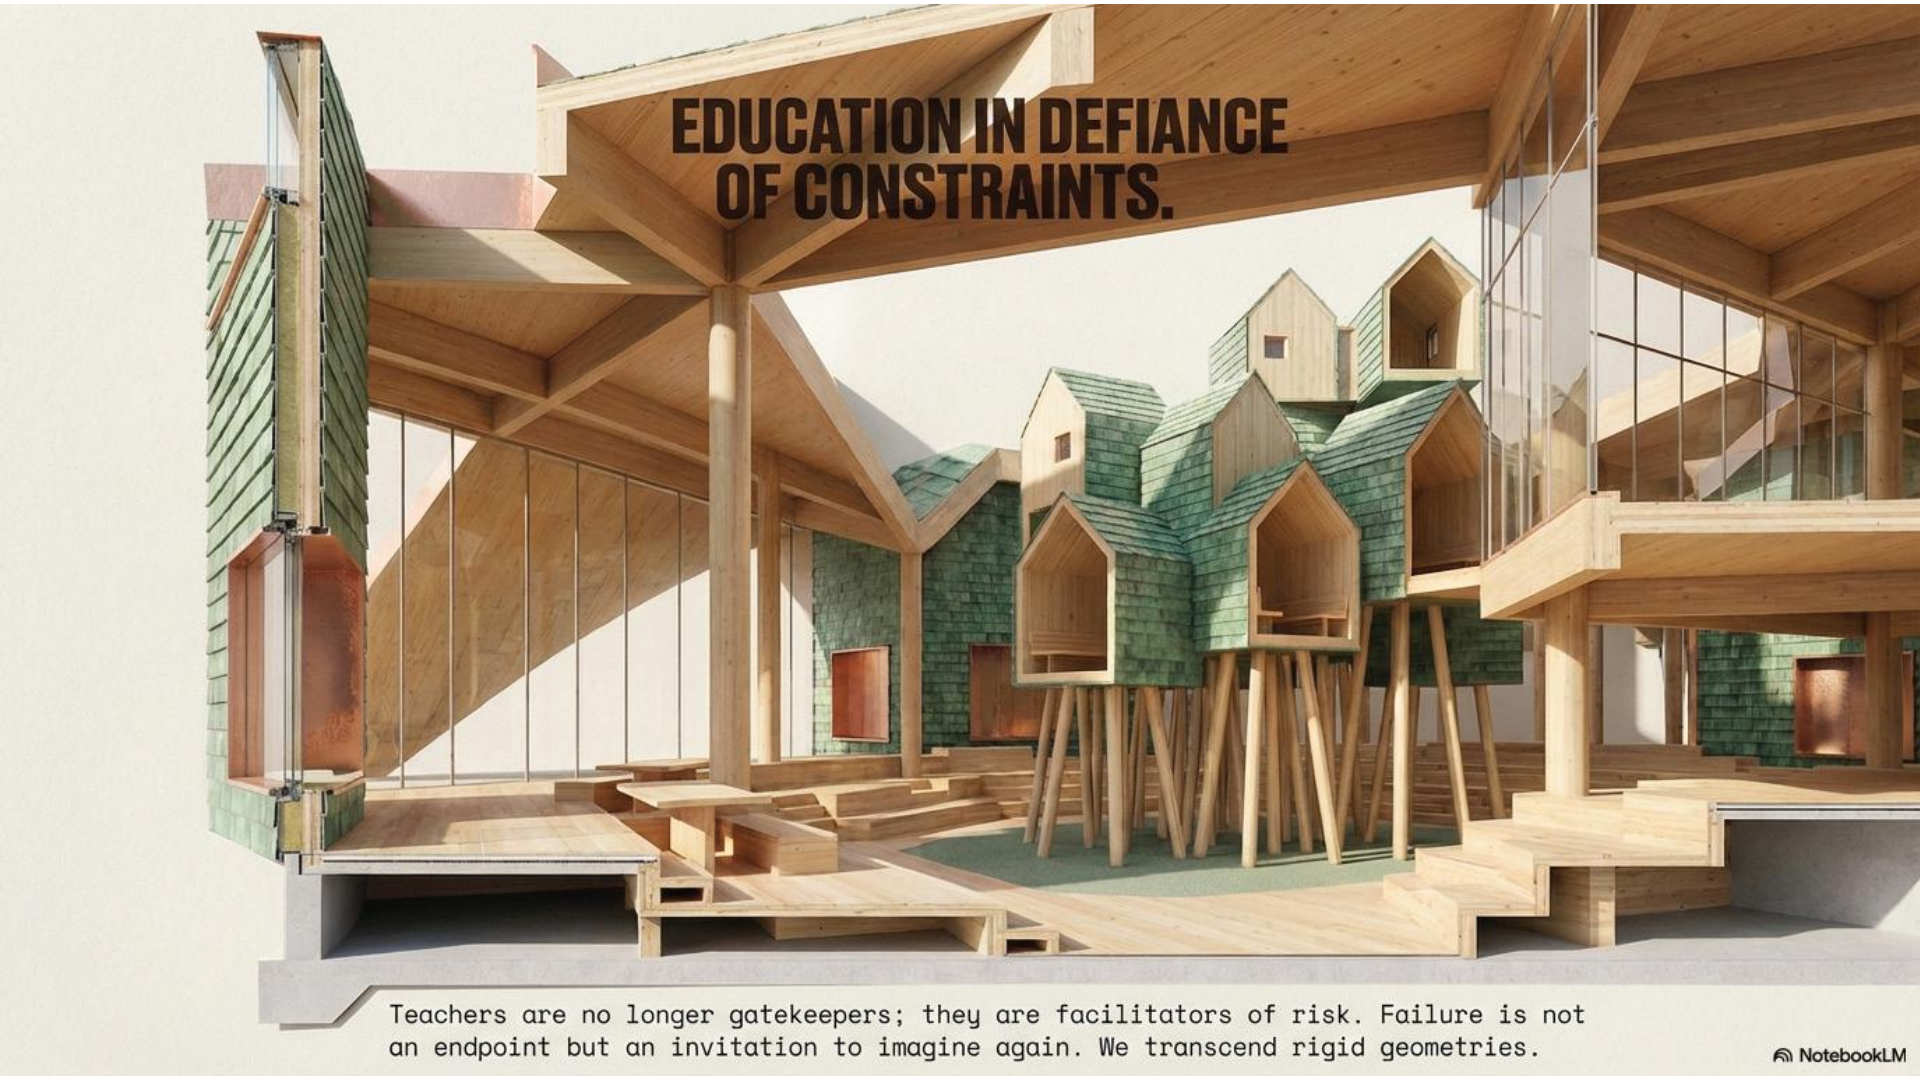
What if infrastructure bloomed? Moving past ‘green architecture’ into ‘Floral Tech.’ As shorelines become unpredictable, our architecture becomes amphibious, buoyant, and delightful.

NotebookLM

# AI AS CO-CREATOR

Digital tools are core to our pedagogy. AI is not a replacement but a co-creator, offering new perspectives on form and space that allow us to manipulate matter in ways previously unimaginable.

NotebookLM

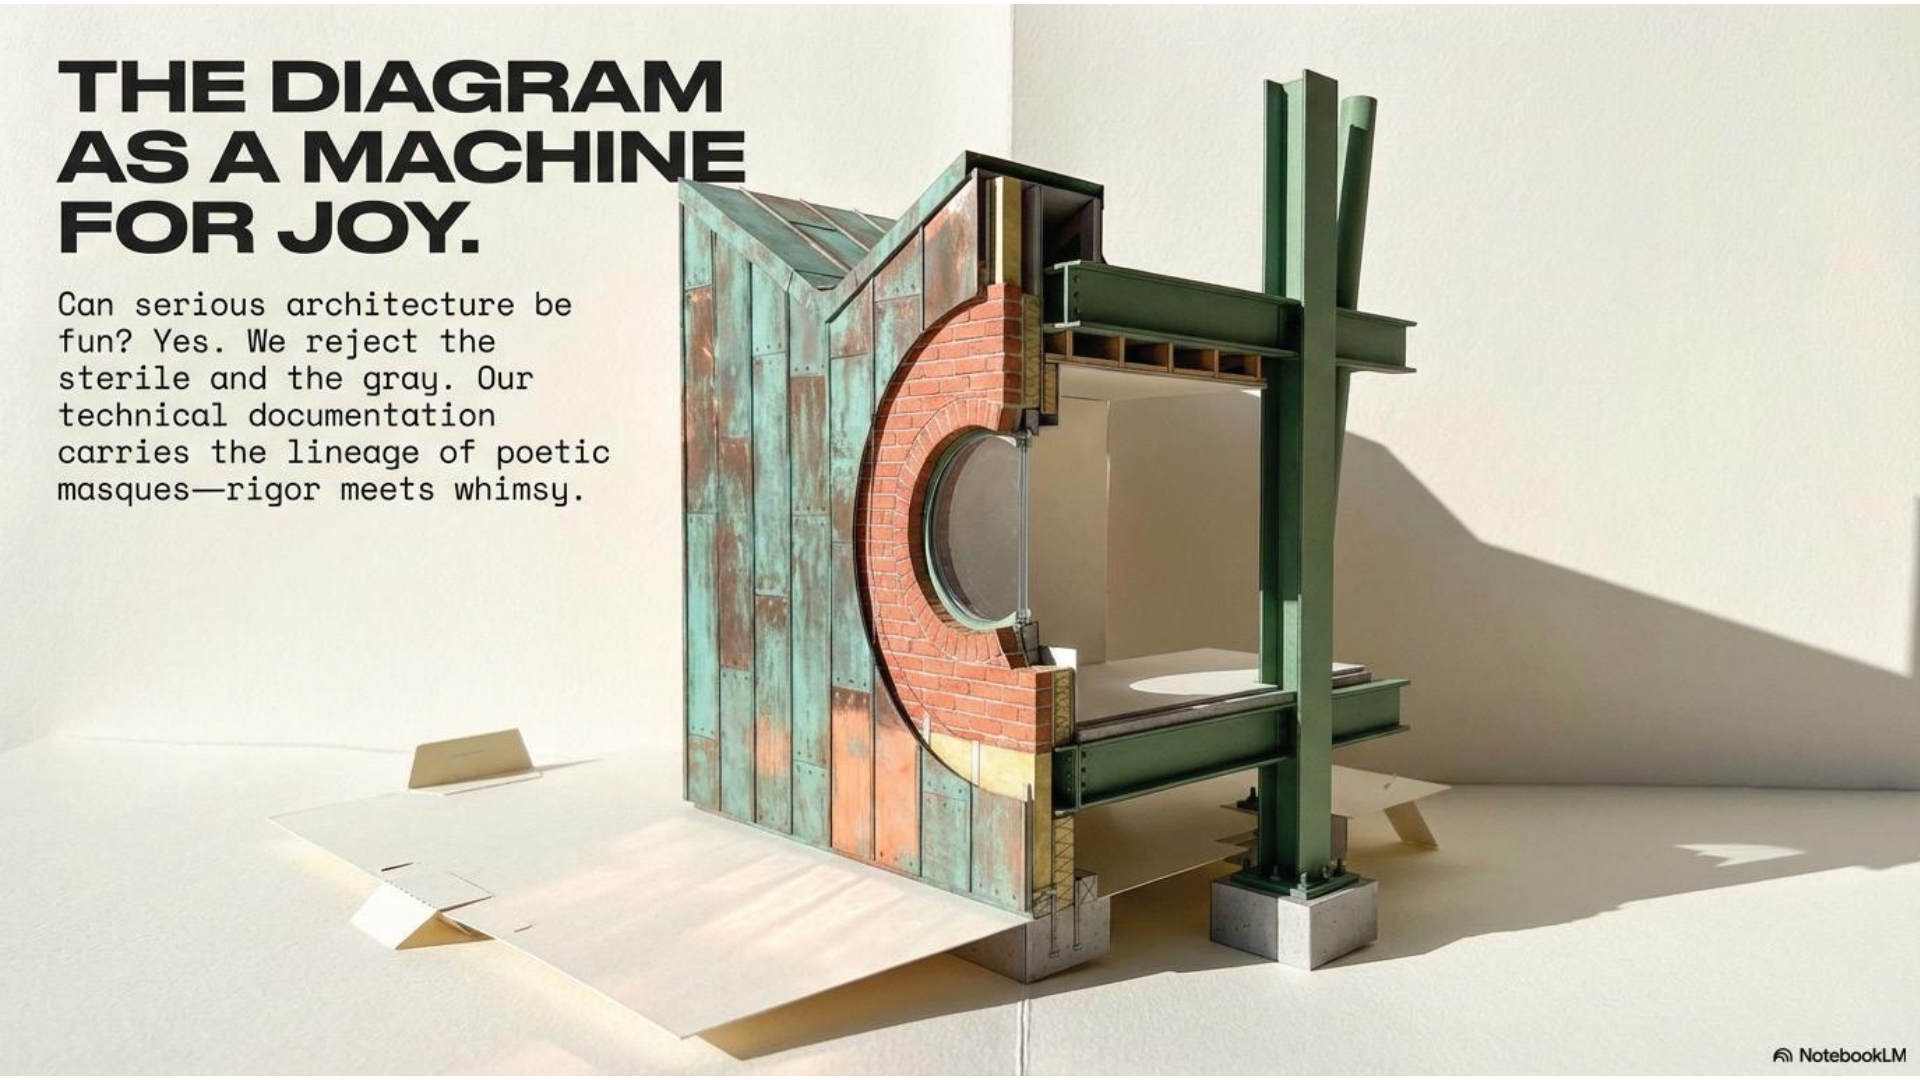


Teachers are no longer gatekeepers; they are facilitators of risk. Failure is not an endpoint but an invitation to imagine again. We transcend rigid geometries.

NotebookLM

# THE DIAGRAM AS A MACHINE FOR JOY.

Can serious architecture be fun? Yes. We reject the sterile and the gray. Our technical documentation carries the lineage of poetic masques—rigor meets whimsy.



NotebookLM

THE FUTURE IS A DREAM.
Surjan Super School is a beacon for a new age. Here, architecture is not just something we build; it is something we dream.

DISTRICT 02: THE URBAN MEADOW

# The Immersive Lawn

The hardscape of the city floor is replaced by dense, synthetic floral fields. This shift in texture prioritizes softness and play, inviting direct tactile engagement from the public.

Location: Battery Park conversion.
Scale: 1:1.
